About GeoSolutions

GeoSolutions is a geospatial ICT company with a strong commitment to providing innovative, robust, cost-effective **professional services** and solutions based on best-of-breed **Open Source** technologies.

GeoSolutions commitment to **Open Source** software goes beyond simple usage and advocacy since our associates are core developers of a wide number of projects (**GeoServer** and **GeoTools** to list a few). Nevertheless, since our objective is the **absolute client satisfaction**,

seamless interoperability and integration with COTS software and existing infrastructures is our primary concern.
